Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 March 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Claims 1-30 were presented for examination.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a computer software program and method including capturing HTTP commands; storing HTTP commands; retrieving HTTP commands; and transmitting HTTP commands with particulars including an entity of HTTP session commands and API as claimed in claims 1-14, classified in class 709, subclass 228.
 - II. Claims 15-30, drawn to a computer software program that modifies a client-side trading system output to market orders that are transmitted to a remote broker site and that can be selectively initiated by a user that will act as an interface between a client-side trading system and a server-side trading system with particulars including code for modifying the output of a client-side trading system as claimed in claims 25-30, classified in class 709, subclasses 203 and 246.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.
4. In the instant case, invention I has separate utility such as it is usable by any system which lacked features of the second group of claims, e.g., a computer software program that modifies a client-side trading system output to market orders that are transmitted to a remote

broker site and that can be selectively initiated by a user that will act as an interface between a client-side trading system and a server-side trading system with particulars including code for modifying the output of a client-side trading system particulars, classified in class 709, subclasses 203 and 246. See MPEP § 806.05(d).

5. The invention II has separate utility such as it is usable by any system which lacked features of the second group of claims, e.g., a computer software program and method including capturing HTTP commands; storing HTTP commands; retrieving HTTP commands; and transmitting HTTP commands with particulars including an entity of HTTP session commands and API particulars, classified in class 709, subclass 228. See MPEP § 806.05(d).

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

7. A telephone call was made to Michael Kroll on 08/25/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

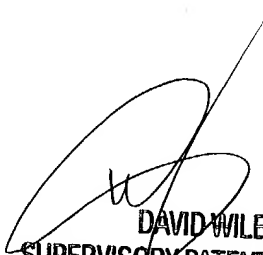

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott M. Collins whose telephone number is 703.305.7865. The examiner can normally be reached on Mon.-Friday, 8:00 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A Wiley can be reached on 703.308.5221. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
